## Central Valley Regional Water Quality Control Board

21 April 2015

David Guy, President  
Bruce Houdesheldt, Director, Regulatory Affairs  
Northern California Water Association  
455 Capitol Mall # 335  
Sacramento, CA 95814

### **EXTENSION TO SUBMIT THE ANNUAL MONITORING REPORT COMPONENT 20 – SUMMARY OF MANAGEMENT PRACTICE INFORMATION**

The Central Valley Regional Water Quality Control Board received your letter dated 24 February 2015 requesting an extension to submit the MRP Report Component 20 of the first Annual Monitoring Report (AMR). According to the General Order R5-2014-0030, Sacramento Valley Water Quality Coalition (Coalition) is required to submit its first AMR by May 1, 2015 including the Report Component 20. The Coalition anticipates receiving more than 17,000 completed farm evaluation templates and the information will then be compiled in order to fulfill the requirements of Report Component 20. Due to the large volume of farm evaluations and the complexities with translating the information received into usable data, I am granting the Coalition's request to extend and submit the Report Component 20 of the AMR by 1 August 2015. The May 2015 deadline to submit all other components of the AMR except Component 20 remains unchanged.

If you have any questions regarding this letter, please contact Lynn Coster at [Lynn.Coster@waterboards.ca.gov](mailto:Lynn.Coster@waterboards.ca.gov) or (530) 224-2437.

Sincerely,

*Original Signed by Adam Laputz, for*
